

I believe it is and should be my right to decline anyone entrance to my home. If I deny telemarketers from calling my house, it is my choice and should remain my choice. I have never purchased from a solicitor over the phone and they have only served to anger and frustrate me. To change our law to allow such calls to my personal residence would be a great injustice! Please leave our NJ regulations concerning "sales calls" to remain in place. Any one who wants these calls is still able to receive them, but by removing our regulations or making them weaker, you are only allowing unwanted calls to keep going!

Thank you.
